THE KWAJALEIN HOURGLASS

(Divers load equipment into a boat for a practice search and recovery dive to look for a lost rudder. For more on the Kwajalein Scuba Club, see Page 4.)

(Photo by Elizabeth Davie)

It seems things just never change

An oil rich Middle Eastern country under control of radical people is nearing completion of a nuclear reactor plant.

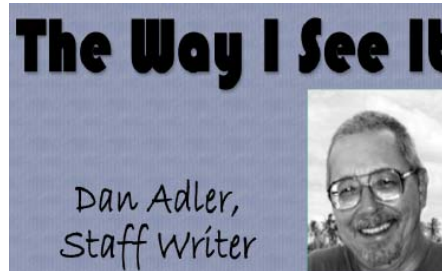

World governments are worried and wondering what to do. Sanctions are mentioned. 'Strong' United Nation resolutions asking the country not to complete the plant are drafted.

The French, Germans and British are all in negotiations with the leader of the country.

The country building the plant ignores the threats and pleas and thumbs it's nose at the rest of the world.

Nations realize this dangerous country can't be allowed to go nuclear. Yet the dithering and the hand wringing continues in the world's capitols. What to do? What to do?

The problem is solved when Israeli warplanes appear in the sky above the plant and bomb it into rubble. The

day was June 7, 1981.

Letters to the editor

Fishing tournament raises \$1,750 for scholarship fund

On behalf of the Kwajalein Atoll International Sport Fishing Club, I would like to extend a special thank you to all Kwaj and Roi residents, temporary duty personnel and U.S. Army Kwajalein Atoll visitors who participated in the Big Strike Fishing Tournament raffle. Thanks to your contributions, \$1,750 will be donated to the Yokwe Yuk Women's Club high school scholarship fund.

— Trudy Butler, tournament director

Thanks for prayers, cards, thoughts on death of father

Aloha and mahalo to all of you who sent thoughts, prayers, cards and wishes home with me as my family and I said goodbye to my father, Ernest Akana Leong, Jr.

On behalf of my mother and all my family, thank you and God bless.

— The Grundon-Leong ohana

Resident unhappy King holiday was not honored

I am writing this letter to express my disappointment that U.S. Army Kwajalein Atoll did not acknowledge the King Holiday. The holiday is more than just a day off.

There should have been some type of program to commemorate Dr. King's legacy. How many children on

island know what Dr. King's dream was? I'm sure not many.

We have ceremonies acknowledging other great Americans, so why no ceremony for Dr. King's legacy that we are all a part of?

As an African American, I feel shortchanged that there wasn't

anything to remember him by except just a day off. Is that all we want our children to know about this holiday? Again, it's very sad that a lot of people consider the holiday as just a day off.

— Michael Harge

To submit a letter to the editor: Keep letters to less than 300 words, and keep comments to the issues. No personal attacks will be printed. However, names will be withheld if requested. Letters must be signed. We will edit for Associated Press style, grammar and punctuation and if you exceed the word limit, space. Limit one letter every 30 days. Send your letter to: *The Hourglass*, P.O. Box 23, Local; or hourglass@kls.usaka.smdc.army.mil.

THE KWAJALEIN HOURGLASS

The Kwajalein *Hourglass* is named for the insignia of the U.S. Army 7th Infantry Division, which liberated the island from the forces of Imperial Japan on Feb. 4, 1944.

The Kwajalein *Hourglass* is an authorized publication for military personnel, federal employees, contractor workers and their families assigned to U.S. Army Kwajalein Atoll. Contents of the *Hourglass* are not necessarily official views of, or endorsed by, the U.S. Government, Department of

Defense, Department of the Army or USAKA. It is published Wednesdays and Saturdays in accordance with Army Regulation 360-1 and using a network printer by Kwajalein Range Services editorial staff.

Fiber optics move closer to reality as survey ship starts planning to lay cable

By Nell M. Drumheller
Editor

The reality of fiber optic connectivity is one step closer to the U.S. Army Kwajalein Atoll. A survey ship docked at Kwajalein Sunday, refueled and departed. The crew is surveying the route between the Republic of the Marshall Islands and Guam as the first tangible step to laying fiber optic cable.

"Fiber optics will open a huge array of possibilities [for the community]," said Corinne Brown, USAKA Information Management director and Information Assurance manager. She added the fiber optics will greatly improve support to Reagan Test Site customers.

On a daily basis, fiber optic cable connecting USAKA with the world may eventually mean better TV reception, high-speed Internet, video conferencing and reliable communications.

William Barattino, chief executive officer for Global Broadband Solutions, LLC, the company which is teamed with Tyco Telecommunications and Fugro in the fiber optics project, said fiber optics offers "earth-shattering capabilities."

He added fiber optics is essential to enabling technology, and fiber optics technology offers virtually unlimited bandwidth. He predicted fiber optics will be around for quite awhile and offers more reliable connectivity than satellite technology.

The fiber will be a dedicated strand, ensuring access security for the U.S. Army.

Using sonar to investigate the ocean floor, the survey crew will create a global positioning system-supported map which will be used to lay the cable.

The crew is made up of geologists, electrical engineers, data processors, marine technicians and navigators who are collecting and processing data. They are getting a real-time view of the obstacles on the ocean route to Guam.

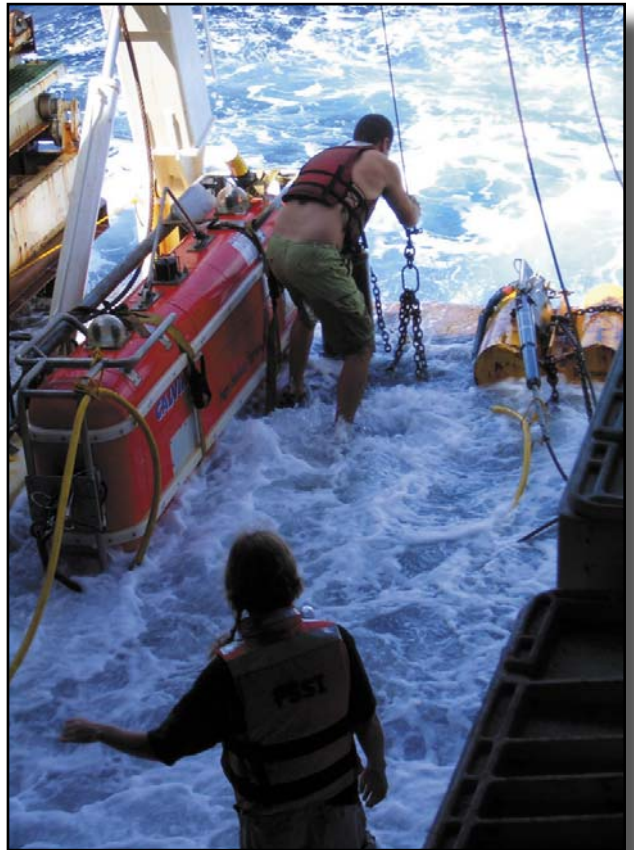

Barattino said "This part of the Pacific is not as well mapped as the Atlantic [between the United States and Europe] and we'll find formations [on the ocean bottom] we didn't expect."

Lisa S. Morrow, a senior manager from Tyco and volcanologist by training, is excited about the underwater survey. She described a lava flow the team identified on the trip from Majuro to Kwajalein. The flow required a slight rerouting from the plan.

The cable will be approximately the circumference of a tennis ball and will hug the ocean floor. The route will be approximately 3,000 kilometers and may go as deep as 9,000 meters.

"If all goes well, the survey from Kwajalein to Guam should be completed by Feb. 8," Barattino said.

The cable is being routed from the RMI to Guam because Guam is a cable hub, according to Barattino. Once connected to Guam

Crew members prepare to deploy sonar equipment to survey the cable route from Kwajalein to Guam.

The fiber optic survey team should arrive in Guam by Feb. 8.
(Photos by Lisa Morrow)

through fiber optics, the USAKA community and customers will have access to reliable, international communications. Through Guam USAKA can connect to the Defense Information Systems Network.

Following the survey, the next step will be cable engineering and a detailed design of the system. Barattino said Brown would be working on "what do we need to support our requirements?"

Brown anticipates the cable will reach Kwajalein within 18 months. It will come on shore at glass beach.

In a visit to USAKA in early January, Lt. Gen. Larry J. Dodgen, commanding general, Space and Missile Defense Command/Army Strategic Command said the cable project will cost between \$50 and 60 million. He said finding new commercial customers could help pay that bill.

A world below

Scuba Club boasts 350 members, still growing

By Elizabeth Davie
Reporter

Diving is rumored to be the number one hobby of island residents. To dive the waters around Kwajalein Atoll residents must be a member of the Kwajalein Scuba Club. According to Bill Williamson, KSC president, all divers must be in good standing with the club to dive. "TDY [temporary duty] visitors and persons visiting on a 480 may purchase a 60-day membership," he said.

To become a member of the club, a diver must be a certified scuba diver. "There are a couple ways to do that. First, you take an open water dive class by one of the fine instructors or you're already certified when you come to island," Williamson explained.

Membership in the club entitles the member to all the air tanks they can use. Williamson said, "The price of a year's membership in the scuba club is less than what it would cost you to make a two-tank dive in most places in the world. We use those funds to

maintain our three compressors, our 303 club-owned tanks and to promote safety."

KSC was the largest scuba club in the world at one time. "To be up there with the big boys you have to have over 500 members. During the mid 90s KSC had 527 plus members. There are at least three clubs in the states that claim over 500 members now. KSC currently has 350 members, and growing," Williamson said.

"There is a little confusion about when the club was founded. We have a patch that has 1960 on it. However, I seem to remember looking at an old *Hourglass* that stated, 'The newly formed Kwajalein Scuba Club' will hold a meeting. That *Hourglass* was in January either 1962 or 1964. I'm still doing research to narrow it down," he added.

Even though KSC can no longer claim the largest club, they still break a record. "KSC is the 'Most Active Club in the World.' We dive more than anybody. In 2005 we made 13,210 dives," Williamson added. This is based on how many tanks the three compressors fill a year. KSC has compressor records back to 1972. The

A diver has an encounter with one of the many shark species that frequent Kwajalein Atoll waters.

Making an ascent after a completed dive.

club can account for more than 400,000 dives since 1972. According to Williamson, one of the reasons it is important to establish when the club was founded is to better fill the gap of the number of dives. "We could very well be approaching half a million dives. No club on earth has ever done this," he said.

Not only does KSC have an impressive number of dives, they also have an impressive safety record. "Divers Alert Network, who is the leading experts on sports diving in the world, looked at our safety record and told me that they knew of no one that could compare. In over 400,000 dives we have had four fatalities," he said.

The scuba club has a few other things they like to brag about. "Skin Diver Magazine rated us the number four wreck-diving designation in the world. Truk or Chuuk Lagoon, as it is now called, is number one. Bikini, just 200 miles north of us is number two, and Bermuda is number three. This is some pretty good company we are rated with. All this considering that very few divers get to dive these waters," Williamson said. "Even without our World War II heritage, the diving here is great. Our coral reef is among the best in the world with the various coral and fish population."

Kwajalein has a diverse population of experienced and not-so-experienced divers. Jenny Schwartz, island resident who has been diving for a month and a half, says she started diving because "it was something I had always wanted to try, and what better place to learn."

Schwartz recommended that anyone who would like to dive should go for it. "Take the class with friends and with one of the instructors that you are comfortable with," she said. "Everything is fascinating. My friends that I dive with will probably kill me if I come to the surface one more time and the first thing out of my mouth is 'What was that one fish?'"

More advanced divers such as Scott Johnson, who has somewhere between 7,000 and 8,000 dives as compared to Schwartz's 21, still finds diving exciting. "I get excited anytime I see a fish or invertebrate I've never seen before. Or when I see animals I already know unexpectedly behave in different ways. Or when I happen upon a shipwreck I didn't know was there. Or especially when I run across a nudibranch I've not

previously found. I won't say it's impossible to have a bad dive, but it's a rarity," he said.

Danny Barthle, who has been diving for about a year and has 107 dives, gave advice to new divers, "Relaxing is possibly the hardest thing for most new divers. New divers tend to use up a lot of their air supply quickly and the hardest thing for me to do was to relax to make the dives last as long as possible. You don't have to be the best swimmer to enjoy scuba; some water skills are necessary, however, with the proper equipment and training, scuba can be a very safe and fun activity for very little money, especially on Kwajalein."

Barthle agrees with Schwartz and says people should try diving. "In short, the freedom to interact with the underwater environment is quite possibly the most amazing experience there is."

KSC's latest event was Thursday at Camp Hamilton. Approximately 23 divers and four boat operators conducted a search for a lost laser rudder. The search took about 45 minutes. Bruce Premo found the rudder, coincidentally, he lost it as well. Since all the divers and boat drivers were there to help, Premo gave up his prize of a free boat session. Names were drawn out of a hat, of the people helping out; Sue Van Enger won the prize.

KSC, the largest club on island, does more than dive. "In 2005 we held the President's Ball and the Christmas Party, both firsts for the club. 'Light Up the Lagoon,' a tribute to 9/11, was the greatest thing I believe this club has ever done. Hundreds of island residents came to out to Emon Beach to watch. We have assisted the Marine Police with search and recovery. We've donated to charitable events. We hold an underwater pumpkin carving contest, which is the funniest thing I've ever seen underwater. Who could forget Scuba Santa and all the children on the beach? In 2006, we have many events underway. Feb. 26, starting at 8 p.m. we will try to light up the ski area wreck." Barthle, coordinator of the wreck glow, said, "this should be a great opportunity for divers who want to experience night diving in a large group."

For more information on the scuba club, call Williamson at 53822.

Taking care

January is Cervical Health Awareness month

By Amanda Curtis, RN, and Inge LeBlanc, RN, CCRN
Kwajalein Hospital

The U.S. Congress designated January as Cervical Health Awareness Month.

A Pap test and pelvic exam are important parts of a woman's routine health care because they can detect cancer or abnormalities that may lead to cancer of the cervix.

Women should have a Pap test at least once every three years, beginning about three years after they begin to have sexual intercourse, but no later than 21.

Women from 65 to 70 who have had at least three normal Pap tests and no abnormal Pap tests in the last 10 years may decide, after talking with their clinician, to stop having Pap tests. Women who have had a hysterectomy do not need to have a Pap test, unless the surgery was done as a treatment for pre-cancer or cancer.

If the Pap test shows abnormalities, further tests and/or treatment may be necessary.

About 55 million Pap tests are performed each year in the United States. Of these, approximately 3.5 million (6 percent) are abnormal and require medical follow-up. A physician may simply describe Pap test results to a patient as 'abnormal.' Cells on the surface of the cervix sometimes appear abnormal but are rarely cancerous. It is important to remember that abnormal conditions do not always become cancerous, and some conditions are more likely to lead to cancer than others. A woman may want to ask her doctor for specific information about her Pap test result and what the results

mean.

Human papillomavirus infection is the primary risk factor for cervical cancer.

Having many sexual partners is a risk factor for HPV infection. Although most HPV infections go away on their own without causing any type of abnormality, infection with high-risk HPV types increases the chance that mild abnormalities will progress to more severe abnormalities or cervical cancer.

Still, of the women who do develop abnormal cell changes with high-risk types of HPVs, only a small percentage would develop cervical cancer if the abnormal cells were not removed. Studies suggest that whether a woman develops cervical cancer depends on a variety of factors acting together with high-risk HPVs. The factors that may increase the risk of cervical cancer in women with HPV infection include smoking and having many children.

For more information about cervical cancer, see the National Cervical Cancer Coalition's Web site at www.nccc-online.org.

CHANGE, from Page 2

The country building the plant was Iraq, ruled by Saddam Hussein.

The air strike was condemned by world governments as an unprovoked attack.

The Israelis answered that under no circumstances would they allow an enemy to develop weapons of mass destruction against their people.

While other nations were publicly condemning Israel, they privately breathed sighs of relief that the problem had been taken care of.

A framed satellite photo of the destroyed nuclear plant was sent to the commander of the Israeli Air Force with an inscription. It said, "With thanks and appreciation." It was signed by the Secretary of Defense, Dick Cheney.

Here we are a quarter of a century
The Kwajalein Hourglass

later and the world is dithering again. Different country, same problem.

If anything, Iran with a nuclear weapon would be more dangerous than Iraq. Iran is a major supporter of the world's terrorists. Iran's president wants nothing less than the destruction of Israel. He has threatened to shut off oil shipments to the west. He had threatened to close the sea lanes for shipping oil out of the Middle East.

I'm not very good at making predictions, but I'd bet a good sum of money that Israel will not allow Iran to develop a nuclear weapon anymore than they allowed Iraq to.

The likely scenario isn't a good one.

If Israel does attack Iran, the flow of oil would almost certainly be shut off and possibly Syria and other Arab countries would join Iran in a war

against Israel. The entire Middle East could become an inferno. The world would be looking at oil prices of \$100 or more per barrel. Gasoline prices in the United States could jump to \$5 or more per gallon. There would also be the additional problem of China, which is one of the biggest buyers of Iranian oil. How would they react to an attack on Iran?

It would appear at this time no diplomatic solution is going to be found. Iran refuses to stop its nuclear program which doesn't leave too many options open. Sanctions won't work. Iran's president has the attitude that we (the west) need them more than they need us.

The world is at a critical crossroads in history. How this problem is handled will affect everyone on earth for decades to come.

Come to Grace Sherwood Library for the first book draw of 2006. We have "Uncle Wiggly's Story Book" for the children and a box set of Jack London stories for adults. Sign up by Monday.

Newest environmental standards are approved

U.S. Embassy, Republic of the Marshall Islands
News Release

On Jan. 12 the Republic of the Marshall Islands Cabinet approved the newest revisions to U.S. Army Kwajalein Atoll's environmental oversight regulations, called the "USAKA Environmental Standards." The approval followed a briefing to the Cabinet on the revisions, introduced by U.S. Ambassador Greta Morris and presented by the UES Project Team Co-Chairs, Randy Gallien of the U.S. Army Space and Missile Defense Command and John McCarroll of the U.S. Environmental Protection Agency.

The UES are the product of a sixteen-year long team effort between the U.S. Army, U.S. Environmental Protection Agency, U.S. Fish and Wildlife Service, U.S. National Marine Fisheries Service, U.S. Army Corps of Engineers, and the RMI Environmental Protection Authority to forge a consensus document for the environmental oversight of U.S. activities at USAKA. Required by the Compact of Free Association, as amended, the UES serve as the environmental protection governing standard for both U.S. activities at USAKA and USAKA activities within the Republic of the Marshall Islands. The Standards must undergo periodic review; any proposed revisions must be approved by the governments of both the United States and the Republic of the Marshall Islands.

Each year since 1995, the UES Project Team has met to update the document and then brief the U.S. Government and the RMI Cabinet about suggested procedural and substantive changes to the UES. This year's revisions were proposed at the USAKA Environmental Standards and Procedures 9th Annual Review Meeting, held in Washington D.C. on February 24-25, 2005. As both the U.S. Government and RMI Cabinet have approved this year's proposed revisions, following the January 12th Cabinet brief-

ing U.S. Ambassador Greta Morris and RMI Minister of Foreign Affairs Gerald Zackios signed their approval of the revisions on behalf of their respective governments.

The 2005 revisions include:

- Strengthened procedural requirements for a Document of Environmental Protection (DEP), the UES mechanism for permitting consultation
- Updated water quality criteria for salinity
- Revised separation distance for incompatible gas cylinders
- Revised hazardous waste and waste petroleum products definitions
- Modified inspection requirement for storage areas on uninhabited islands
- Expanded list of agencies designated to review changes to the USAKA Historic Preservation Plan

The implementation and review of the UES continues to be a successful effort from several perspectives: strong environmental protection standards are in place for USAKA; compliance with the standards – both in letter and spirit – is resulting in environmental improvements at USAKA; and the process of standards development and implementation is a collaborative one between the RMI and U.S. The RMIE-PA and other RMI officials have been full partners in UES development and implementation from the beginning. This involvement and the spirit of consensus that the UES represents benefit both countries and the environment.

As a result of the UES, the environment of Kwajalein Atoll used by the U.S. is being protected to an extremely high degree — using standards consistent with environmental protection within the U.S. and RMI. The 2005 revisions to the standards will result in more transparent oversight by government agencies in both the U.S. and RMI, and better implementation of the UES by the U.S. Army.

Photos are needed

For the photography exhibit March 5-6,
in the high school multi-purpose room.

Call Dave Harris, 51133 or 51191, for
exhibitor's package.
